(54) AUTOMATIC ANSWERING TELEPHONE SET

(57)Abstract:

PROBLEM TO BE SOLVED: To confirm a trunk line number registered in an abbreviation dial number by displaying the trunk line number onto a pocket beeper after calling it by the pocket beeper.

SOLUTION: When an automatic answering telephone set 12 receives a specific command (PB signal) at its PB signal reception section after receiving a call from an external telephone set 11 and replying the call, a line control section interrupts once the line and acquires again the line and makes a call to a pocket beeper number registered in a pocket beeper number registration memory. A trunk line number registered in an abbreviation dial number is sent and displayed on an LCD display section 14 of the pocket beeper 13. The user can confirm the trunk line number registered in the abbreviation dial number of the automatic answering telephone set 12 by displaying the trunk line number onto the LCD display section 14 of the pocket beeper 13.
